Summary

Full-Stack Developer experienced in building scalable applications with React.js, Node.js, Flask, and MongoDB. Skilled in REST APIs, real-time features, and responsive UI with focus on performance and clean architecture.

Skills

Languages: Python, JavaScript (ES6+), HTML5, CSS3, SQL

Technologies: React.js, Redux, Node.js, Flask, Express.js, MongoDB, Mongoose, JWT, Git/GitHub, REST APIs, Postman, Netlify, Render

Education

Virtual University of Pakistan, BS in Software Engineering 2019 – 2023

Relevant Coursework: Data Structures & Algorithms, Database Systems, Web Development, OOP, Computer Networks

Experience

Full Stack Developer (Freelance) – Self-Employed March 2026 – Present

- Delivered MountainDweller (MERN/Stripe) with multi-level referral engine and payout dashboard; built Alam Traders distribution system with inventory/order/invoicing workflows.
- Created RPS Kasur school management website (admin dashboards, announcements, staff/student records) and web-based game automation suite with live activity logs.
- Architected Electron desktop automation platform handling 50+ accounts/minute with multi-process isolation, license management, and WebSocket telemetry.

Full Stack Developer – NaqviX, Lahore Dec 2023 – Mrh 2026

- Develop and maintain full-stack web applications using React.js, Node.js, Express.js, and MongoDB, improving operational efficiency for internal teams.
- Build RESTful APIs with JWT authentication and request validation, serving 1,000+ daily requests with average 300ms response times.
- Optimize frontend performance through code splitting and lazy loading, reducing initial load times by 35% and improving Lighthouse scores from 65 to 92.

Projects

E-Commerce Store | React.js • Redux • Context API • REST APIs

- Developed responsive e-commerce frontend with product catalog, category filtering, search functionality, and detailed product pages.
- Implemented shopping cart with add/remove items, quantity management, localStorage persistence, and REST API integration with Redux for global state management.

Sports Society Management | React.js • Flask • Redux Toolkit • Socket.IO

- Built full-stack sports platform with role-based auth for participants, coaches, and admins featuring team management, event scheduling, and secure payment processing.
- Implemented real-time chat using Socket.IO and Redux Toolkit with RESTful Flask/MongoDB backend supporting profile management, team approvals, and event workflows.

Desktop Automation Platform | Electron • Node.js • SQLite • Firebase • WebSocket

- Architected Electron desktop app with multi-process isolation and profile-based multi-instance system supporting 5+ concurrent sessions. worker pools, and SQLite optimizations (WAL mode, connection pooling)
- Engineered high-throughput automation engine processing 50+ accounts/minute using batch operations and SQLite optimizations with enterprise security features.
- Expanded resilient WebSocket client with circuit breaker patterns, recovery, Firebase auth, and license management.
